## Heart and Soul of the laboratory

The lab bench is the main element of the laboratory. Other furnishings and accessories are assembled around it, creating a well-functioning lab. Lab benches are the ideal solution for a modern, state-of-the-art laboratory.

Lab benches provide the lab user with the highest quality and most flexible lab system, adapting to the demanding needs and changing equipment in the lab of today and tomorrow. Ergonomically our systems accommodate the necessary lab equipment while maintaining a safe and healthy work environment. They are robust and extremely flexible, easily adapting to individual needs, new equipment, and changes in environment or work. Carefully selected materials and ingenious design provide maximum durability, stability and usability even under maximum load.

Lab benches come in three standard depths of 24", 30", and 36", and five standard lengths of 40", 48", 60", 72", and 80". Casters may be installed to provide mobility for reconfiguration, cleaning, or repositioning. With the installation of uprights, the lab bench becomes a complete workstation with a multitude of accessories to choose from to customize each workspace.

## The lab bench is the heart of the laboratory

Costs associated with health and safety problems are an ever increasing concern to all laboratories. This concern drives labs to seek solutions to provide a healthy, safe and productive working environment. Designing a workplace with ergonomics in mind improves the employee's well-being, which in turn improves productivity. Companies using correct ergonomic principles in the laboratory will reduce costs from injury and increase bottom line profits from increased productivity.

The modular design of lab benches enables proper ergonomics. With a wide range of accessories and

adjustments, customers are provided with a customized solution using standard components. Modularity and accessories are individually adjustable according to the task and human requirements.

Lab benches and accessories can be adjusted for operators of different heights working with left or right hand. Correctly adjusted workstations decrease stress in the muscles and enables productivity throughout the work day.

### Location of the Correct View Angle

Focus point should follow these guidelines:

- Continual movement of view should be in 30 degree sector
- Continuous view angle should keep the head in a comfortable position (line of view should be 10 to 40 degrees below the horizontal line)
- Displays should be positioned 20 degrees below the horizontal line.

# Lab Bench Ergonomics

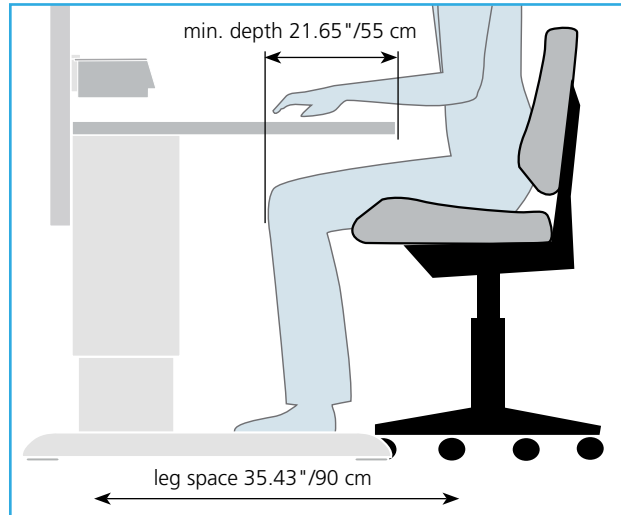

## Seated of Standup Work?

Decision of seated or standing work is dependent upon the work to be executed. The height of the worksurface is determined by such factors as size and weight of the part, precision need, assembly process, repetitiveness, etc. Differences in operator height require height adjustment for the work surface and accessories. Furthermore

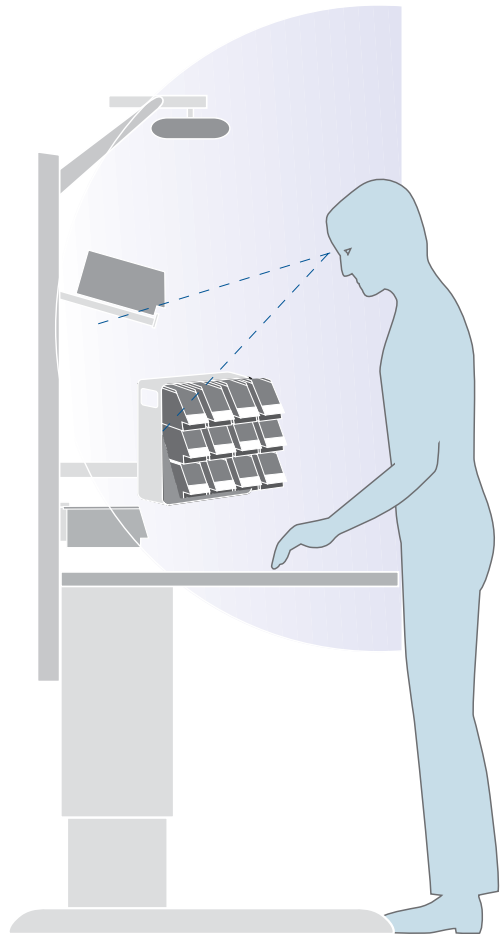

correct leg space, optimal reach distances and directions provide optimal work movements and position for the operator. When designing the work space for a seated operation leg space should be at least 31.50" wide and 35.50" deep at floor level. For stand up work, leg space requirements are much less.

Standup work

Seated work

## Reaching distances and heights

To improve working postures in assembly work, the most often used parts should be placed into the optimal horizontal working area within workers sight. Avoid overly large or deep tables, which can cause improper reach and reduced productivity. Assembly work is most ergonomic when parts are within easy view and reach.

The vertical work area and reach zone can be fine-tuned with accessories. Sovella's height adjustment arms optimize work movements and keep parts or tools within easy access. Operators can work with wrists and arms in optimal posture with shoulders relaxed. Tilted bin rails and shelves keep the wrist in a neutral position with picking parts. The tilt angle also provides easy identification of the parts with the proper viewing angle.

Utilizing proper reach distance can reduce the workstation foot print to optimize valuable factory real estate.

## **CONCEPT™** Lab Benches

Concept™ lab benches are designed for the needs of laboratory industries. There are many possible adjustments, all components fit together seamlessly, and each detail is designed for real world functionality. The lab bench adapts to the work process and the needs of the user. As a result all movements of the user can be optimized, which in

turn increases performance and productivity and decreases work-related stress.

Concept™ lab benches are height adjustable in manual, motorized and hand crank versions. All Concept™ frames can be equipped with casters to create mobile workstation solutions.

# Three easy steps to design your Concept™ Lab Bench:

- 1** Select the bench frame size and the height adjustment method: manual, hand crank or motorized.
- 2** Select a worksurface to suit the frame: laminate, phenolic, or stainless.
- 3** Configure with accessories from page 34-61.

**Concept™ Lab workstation**

### Ergonomic sit and stand lab bench

Sit and stand lab benches are commonly used in testing and inspection. This is why the stroke of Sovella motor lab bench has been increased up to 15.75" inches. Now, the user's working position can be fixed ergonomically both in seated and standing work from 27.55 inches to 43.30 inches.

### Intelligent control box

The new CBD4 control box can be programmed for several parameters: anti-collision, the minimum and maximum height and the speed. A tailor made parametering is programmed at the factory.

## 2 Concept™ worksurfaces

• = In stock products

Three standard choices of tops: postformed laminate, phenolic, and stainless steel.

### Postformed laminate worksurface

Grey laminate usrface with postformed front edge  
Thickness of 1 3/16 inches

### Phenolic worksurface

Black phenolic...

### Stainless steel worksurface

304 stainless wrapped over substrate  
Thickness of 1 3/16 inches

### The W x D x H rule

All our dimensions follow a WDH rule, where the first dimension is the width (W), the middle the depth (D), and the last the height (H).

## TL ADVANTAGE™ lab bench

TL Advantage™ lab benches are well suited for a variety of laboratory applications. TL Advantage™ utilizes an industry-exclusive standard ESD Semi-Conductive paint (proprietary process) and can be outfitted with a plethora of standard accessories. With its incredible strength, flexibility, and durability,

the TL Advantage™ lab bench is the most cost effective ergonomic lab bench solution on the market today. Benches are available in 6 widths, stationary and mobile configurations, and are easily assembled with 4 simple tools.

### Three easy steps to design your own TL Advantage™ lab bench:

- 1 Select a single-sided or double-sided frame size and/or frame extension.
- 2 Select a worksurface to suit the frame: plastic laminate or phenolic.
- 3 Configure with accessories from pages 34-61.

## **Cornerstone™** Lab Benches

Cornerstone™ lab benches are standard tables that are suitable for a broad range of laboratory tasks. The Cornerstone™ bench is guaranteed for regular use with weights up to 1500 Lbs. This degree of strength

is achieved by using a solid table structure. The Basic™ upright bench is ideal for lighter use, when some additional workspace is needed. The slotted upright frame allows for the use of different accessories.

### **Manual height adjustment**

The height of our Cornerstone™ range can be adjusted from 24.75 to 37.64 inches, in 1 inch increments, making these benches suitable for work while sitting or standing.

# Three easy steps to design your own Cornerstone™ or Basic™ Upright Lab Bench:

- 1** Select the table frame: Cornerstone™ lab bench or Basic™ upright bench.
- 2** Select a worksurface to suit the frame.
- 3** Equip with accessories from page 34-61.

**Cornerstone™ Lab bench**

Order No C14-????? •

Please see pages 34-61 for more accessory options.

## 1 Cornerstone™ Lab Bench Frames

• = In stock products

Please see product specification on page 119 for more dimensions.

### Cornerstone™ lab bench frame

1	Series X 30 chair, red	16.73-22.24"H	X30R

# Four easy steps to design your Workshop™ workstation:

- 1 Select the appropriate worksurface: steel, PVC, maple, ShopTop or laminate.
- 2 Select a support for both ends of the worksurface: adjustable or fixed leg, or a drawer unit.
- 3 Use a spacer bar to stabilize the table. An upright attachment frame can be used instead of a spacer bar if upright tubes are used.
- 4 Equip with accessories from pages 34-61.

## Heavy Duty Steel Workstation Table

Order No 14-C1304128

Name	Size inches	Load Cap.	Order No.
Adjustable legs (2)	27.55-37.40		836664-35
Steel worksurface	59.05 x 29.52	1650 lbs	836721-74
Lower shelf	53.93 x 25.51	220 lbs	92435012
Spacer bar	59.05-88.58		836451-35

## 1 Workshop™ Worksurfaces

### Workshop™ Steel Worksurface

- Steel top 1/16 inch
- Painted dark-grey surface
- Blue plastic end edges
- Plywood and chipboard core
- Threaded bushings for attaching legs and drawer units
- 1/8 inch steel top available on request
- Overall thickness of 1.96 inches

### Workshop™ worksurfaces

#### Steel worksurface .059 inches

Order No.	Size (W x D)	max lbs
836720-74	40" x 30"	1650
836721-74	60" x 30"	1650
836736-74	80" x 30"	1650
836722-74	88.58" x 30"	1100

### Structure of the worksurface

The worksurface is an important part of a table's load capacity. The Workshop™ worksurface structure is designed to work in conjunction with the legs and drawers to create a heavy duty system to support very heavy loads. The feet and drawers are attached to the worksurface by integrated threaded bushings.

## 2 Workshop™ Worksurface Support

• = In stock products

Please see product specification on page 120 for more dimensions.

### Workshop™ legs

name	height inches*	order No
Adjustable leg	27.55-37.40	836664-35 •
Fixed leg	31.49	836303-35

\* Height excluding top.

### The W x D x H rule

All our dimensions follow a WDH rule, where the first dimension is the width (W), the middle the depth (D), and the last the height (H).

## 3 Spacer bar/Upright attachment frame

### Spacer bar

width inches	order No
39.37-59.05	852694-35 •
59.05-88.58	836451-35

### Upright attachment frame

Upright attachment frame is needed if the table is configured with slotted uprights. Replaces the spacer bar. Module spacing between mounting locations.

width inches	order No
39.37	852693-35
59.05	860375-35 •
78.74	860725-35
88.58	860376-35

## 4 Accessories

See pages 34-61 for our wide range of workstation accessories.

The Workshop™ table can be configured with a lower shelf for bulky items.

### Lower shelves for the Workshop™ table

name	size W x D inches	max load lbs	order No
Lower shelf for adjustable leg for table 60	53.93 x 29.51	440	92435012
Lower shelf for fixed leg for table 60	53.93 x 29.51	440	92435014
Lower shelf for adjustable leg for table 80	73.62 x 29.51	220	92435013
Lower shelf for fixed leg for table 80	73.62 x 29.51	220	92435015
Lower shelf for adjustable leg for table 88	83.46 x 29.51	220	92435016
Lower shelf for fixed leg for table 88	83.46 x 29.51	220	92435018

The lower shelves include a backstop.

# Accessories provide increased functionality

Well-chosen accessories optimize workstation functionality and increase usability. When a workstation is well-organized and well-equipped,

workflow becomes easier and more efficient, improving ergonomics and making it easier to keep tools in place.

## LED Lighting

LED lights can be mounted to any Light/Balancer rail with included hardware. An additional Universal hardware kit may be purchased for installation on many competitive brands of work stations. LED Tube lights with magnetic attachment option allow lights to be attached under metal surfaces, such as shelves.

Connect up to 8 LED light fixtures to one power source using included connectors. Lights include frosty diffuser cover, power input on sides and top, on/off switch and 13 ft power cord.

### Light Balancer Rails

PTP-5ESD* •	12.20" x 14.17" (x 11.81" H with cabinet series 290, 22.05" H with cabinet series 550) 

\*Includes ground cord.

## Storage Solutions

Shelves are necessary to keep the laboratory organized. Our flexible Sovella® lab shelves offer unique and user-friendly storage solutions. The Sovella® shelving system is built for maximum storage capability and ease of installation. Shelves may be easily adjusted without the use of tools.

### Assemble your Sovella® Shelving System

Select a suitable frame for the shelving system.

Quick  
and easy  
installation

Vertical uprights  
easily attach for  
any shelf width!

### Horizontal rail attached to the wall

- Select a suitable oval horizontal rail length for the space in use and the need for shelf width.
- Rails may be joined together to add seamless extensions.
- Attach the oval rail at an appropriate height using hardware suitable for the wall material.
- Hang the vertical upright on the oval horizontal rail and slide to the desired width.

## Oval horizontal rail, 660 lbs/40"

## Freedom of Mobility

Work is not always confined to a single lab, and you must be able to move the supplies safely from one lab to another. Lightweight Lab carts are ideal for this situation. Due to their modularity and versatile accessory components, our lab carts provide you with an ergonomic mobile lab cart suitable for any lab environment.

Each lab cart can be customized to suit individual requirements and preferences. They can be configured with all standard modules, such as additional shelves and auxiliary tops. They are equipped with four swivel casters (Ø3.94"), two of which have roll and swivel brakes.

Light Grey	35* & 41	RAL 7038	A	A/STD	A/STD	A
Effect Silver Grey	38	AE 4148	A	A	A	STD

\*35 is ESD protected light grey; 41 is non-ESD protected. Please remember that ESD protection will result in a slightly darker shade of color than the given RAL cod.

STD = Standard Factory Color, normal warehouse delivery, listed price.

A = Factory color. Check with your sales representative for delivery times and prices.

Tables, cabinet, and drawer frames are light grey (RAL 7038), excluding the blue drawer unit 71 (RAL 5007).

Outside of the standard color range, additional colors are available on request.

Please contact our sales representatives or email us at [infousa@sovella.com](mailto:infousa@sovella.com).

The color code is included in the code number, either at the end, following the hyphen (e.g. steel shelf M20 860804-35), or in the middle (e.g. in the shelving system 100/40/200 C33407000).

## Lab Bench Dimensions

### Concept™ Lab Benches

- Concept™ bench frame consist of a pair of legs, rear case, and front rail.
- Depth of Concept™ bench frame is 23.62", 29.5" or 35.43" with the use of depth kit.
- Concept™ frames are available in widths: 39.37", 47.24", 59.05", 70.86" and 78.74"
- Table frames can be easily equipped with any 12mm stem caster.

### Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment parts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

### Concept™ Lab Bench - Manual

- Leg pair Concept™ 30 can support 1100 lb load, evenly loaded.
- Concept™ 30 can be equipped with tilting mechanism. The tilting frame is for width 59.05". Tilting frame is equipped with motor, which can tilt 85 lb load. Maximum tilting angle is 50 degrees.

- Height adjustment of Concept™ 30 frame is 26.62" - 44.34" with table top and adjustment glide. Height adjustment is made by adjusting telescoping legs and tightening friction screws on the back and sides of the legs.

- Bench frames can be easily equipped with any 12mm stem caster.

## Concept™ Workstation - Motorized

- Leg pair of Concept™ motorized frame can support a static load of 1100 lbs, evenly loaded on a worktop and a dynamic load of 660 lbs, evenly loaded.
- Frames are available in depths of 23.62", 29.52" and 35.43".
- Frames are available in widths of 39.37", 47.24", 59.05", 70.86" and 78.74"
- Height adjustment range of Concept™ motorized frame is 27.80" - 43.55" with table top and adjustment glides. Adjustment is made with 2 linear actuators, using an up/down memory desk switch.
- The speed of the frame is .70" / sec without load

- The speed of the frame is .59" / sec with load
- The desk switch can be installed on the front, left or right side of frame.
- The desk switch has multi position memory system to be able to set the frame to three customer based heights and up-down buttons for random settings.
- All units have soft-start and soft-stop circuitry.
- The table can be manually driven over the memory positions.
- Silent operation (45 db (A) DS/EN ISO 3746
- Capable of operations in ambient temperature 41 to 104 degrees Fahrenheit

## TL Advantage™ Workstation

- TLA-worktable™ frame consist of leg pair, spacer bars, worksurface support assembly.
- TLA™ leg pair can support 660 lb load, evenly loaded.
- Depth of TLA™ table frame is 32.87" for single sided frame and 59.05" for double sided frame.
- Frames are available in widths: 49.88", 61.69" and 73.74".
- TLA™ can be extended with extension table frames, widths 49.88", 61.69" and 73.74". These extension table frames can also support 660 lb load, evenly loaded.
- TLA™ can be extended with a corner table frame, 32.87" x

32.87". This corner table frame can support 660 lb load, evenly loaded.

g. Height adjustment of TLA™ worksurface assembly is accomplished by mounting the worksurface assembly at the desired height along the length of the slotted vertical leg. Slots are 1" increments.

### Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment components: 7 gauge CRS steel

## Cornerstone-WS™ Workstation

- Cornerstone-WS™ worktable frame consists of one right and one left lower “H” leg. Upper horizontal front rail and upper horizontal rear structure for structural stability and slotted upright attachment.
- Cornerstone-WS™ worktable frame can support 1500 lb load, evenly loaded.
- Depth of Cornerstone-WS™ worktable frame is 23.62", 29.52" or 35.43"
- Frames are available in widths: 47.24", 59.05", 70.86".
- Height adjustment from 23.5" to 36.39" in 1 inch increments. Telescoping leg parts are set with through bolts.

- Table frames can be easily equipped with any 12mm stem casters.
- Slotted upright mounting brackets are included.

### Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Attachment parts for bolts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel
